People with intellectual and developmental disabilities

Intellectual and developmental disabilities (IDDs) are disorders diagnosed in childhood. They are usually present at birth and negatively affect the trajectory of the individual's physical, intellectual, and/or emotional development. Many of these conditions affect multiple body parts or systems. Some of the most common known causes of intellectual disability include fetal alcohol syndrome; genetic and chromosomal conditions, such as Down syndrome and fragile X syndrome; and certain infections during pregnancy. For a list of common developmental disabilities with further information can be found at <https://www.cdc.gov/ncbddd/developmentaldisabilities/specificconditions.html>.
